17:15 – 17:30 – Conclusion of seminar

Seminar Objectives

- To raise awareness of digital ethics issues within higher education
- To support HEIs in developing and adopting responsible digital technology policies
- To foster a culture of digital citizenship and respect for rights in online education

Expected Learning Outcomes

By the end of the seminar, participants will:

- Understand core principles of digital ethics and their relevance in education
- Be able to identify institutional gaps in digital responsibility and rights protection
- Gain insights into policies, tools, and practices for promoting ethical digital engagement
- Be prepared to implement or advocate for ethical guidelines within their institutions

Target Groups

- University administrators, deans, and faculty members
- IT officers and digital service departments
- University legal advisors and academic integrity units
- Representatives from ministries of education and digital development
- Experts in ethics, law, digital policy, and AI
- Student councils and youth digital rights advocates
- NGOs working on privacy, digital literacy, and online safety
