PROJECT DESCRIPTION:

Objectives

Importance of the implemented educational program (BA) in Business Informatics is conditioned by modern trends in the development of economy and management, and at the same time the acute shortage of qualified personnel capable of effectively organizing complex information systems, management systems, building business models and government management.

The above-mentioned program is fundamentally new, their being in great demand is connected with the active development of information technologies-spheres in various sectors of the economy in Kyrgyz Republic, which requires highly qualified personnel in the field of information systems and of information and communication technologies.

Thus, this project is aimed at increasing the capacity of graduates in Business Informatics and providing the Kyrgyz labor market with highly qualified bachelors in business and economics field.

Activities:

- Exchange in experience of teaching staff and students with European universities, academic mobility
- Training of teaching staff
- Organization of seminar on the application of Information Technologies in the field of business and economics
- Organization of seminar-training for teaching staff and employees of business partners
- Improve the material and technical base
- Improve learners' business process modeling skills with IT technology
- Organize conferences jointly with partner universities
- Develop new curricula
- Develop new curricula for courses
- Develop new methods for assessing the relationship between university and employers
- Improve the conditions and content of contracts between employers and the university
- Create conditions for the provision of services by the university for business customers, entrepreneurs, stakeholders or parties interested in business
- Publishing manual for teachers and students, articles on changes in the educational process
- Publish the results of the project work
- Implement all the activities related to project management

Results

On the basis of collaboration with European partners and as a result of the project: the qualification of the faculty and students of the department is increased; the skills of graduates in applying IT and ICT in business and economics will improve; interest of employers to graduates of the given program will increase; improves the provision of services through IT technology in business and economy; improve curricula, programs and material and technical basis; the interrelation of stakeholders is strengthened, certificates confirming the acquired skills in the framework of the project are taken into account by employers.

Partner Search Form
