Relevance to national or regional priorities	Internalization of higher education institutions
Brief need analysis	<ul style="list-style-type: none"> - Science transferring of European experience and integration of education system on the national level; - New lab equipments and usage of latest technological opportunities; - Retraining of specialists and social workers in case of social fund and social protection
Objectives and activities	<p>According to the Decrees of OTU on advancing the teaching of personnel tasks and promoting of special professional knowledge's level, both intellectual and university science are set. For this, it is necessary to give stronger material support at the level of the highly developed foreign centers, with the necessary consideration of the state needs and their target tasks.</p> <p>The aim of the project</p> <ol style="list-style-type: none"> 1. Improving the trainings' quality programs in the sphere of social work personnel for the Social Work complex in accordance with international requirements. These training programs should teach specialists in the development and operation of social funding and social protection. 2. Testing of a modern model of Social Work and practical training in order to regulate the Social Work modernization in accordance with the best analogues of developed countries. 3. To create a platform for interaction between education, science and production with the aim of forming modern professional competences in Social Work specialists.
Expected results	The university developed the courses with the support of the European partner universities and the non-academic partners. The European partners have presented different examples of varieties of Bachelor and Master programmes including different courses and the university has created lists of courses that can fit within their

	own specific context. These courses are now under developing, but the activity is not yet completed.
